

Adobe Dreamweaver Level 1

Course DRM-01D 2 Days Instructor-led, Hands-on

Course Description

Our Adobe Dreamweaver course uses the latest version, but if you haven't upgraded yet, the course features work from earlier versions of Dreamweaver as well.

During this two-day, instructor-led course, the first in a series of two courses, students will learn the key techniques for working in Dreamweaver while editing and creating HTML and Cascading Style Sheets (CSS). Learn how to create webpages for the modern web with a minimum of hand coding; work with the latest HTML5 and CSS code and structures; learn web design basics; create a page layout and work with templates,

At Course Completion

Upon successful completion of this course, students will be able to:

- Understand and use the Dreamweaver interface
- Editing and creating HTML and Cascading Style Sheets (CSS)
- Learn how to create webpages for the modern web
- Understand web design basics
- Create a page layout
- Work with templates

Prerequisites

Students should have an understanding of how to use Microsoft Windows operating systems. Students should be comfortable using a mouse, opening and saving files, and with the general operations of computers.
