

Jira App Admin: Effectively Govern a Site

Course ATL-JIRA-2 1 day

Instructor-led

Introduction

In this three-course series, an expert instructor will teach your team how to build a solid foundation so they can administer Jira Cloud with confidence. Your team will also learn how to govern Jira Cloud, automate repetitive manual tasks, and scale their administrative impact by using schemes.

Who Should Attend?

This course is designed for Jira Cloud app admins.

At Course Completion

After completing this course, students will be able to:

- Build a work type scheme
- Create global custom fields and add them to the catalog
- Build a field scheme and associate it with a space
- Create screens to manage what users see in work items
- Build workflows from business requirements
- Create a workflow scheme

Prerequisites

Before taking this course, your team should take the Jira App Admin: Configure Permissions and Global Settings course.

Course Outline

Module 1: Work types and work type schemes

Module 2: Fields and field behavior

Module 3: Configure screens and screen schemes

Module 4: Design and standardize workflows
