

Deploying SharePoint Server Hybrid

Course MS-301A

5 Days

Instructor-led, Hands on

Course Information

SharePoint Server 2019 is designed to meet the demands of modern workstyles. It provides the new modern experiences for users, that are both intuitive and familiar in SharePoint Online. Learn how to deploy and configure the SharePoint Server 2019. We will discuss how to plan and configure SharePoint on premise authentication and security to protect the environment. We will discuss how to manage SharePoint content to align with modern information architecture, how to plan, configure, and manage service applications in SharePoint 2019, such as Managed Metadata, Business Connectivity Services, and enterprise search.

You will also learn how to plan and implement SharePoint hybrid scenarios which provide seamless users experience. We will also further discuss SharePoint hybrid search which gives users easy access to the files they need. And at last, you will learn how to plan the content migration process as well as available resources and tools to use while migrating content to SharePoint Online and OneDrive for Business. Specifically, how to use SharePoint Migration Assessment Tool (SMAT) and SharePoint Migration Tool (SPMT) with different migration scenarios.

6 SATV credits required

At Course Completion

Upon successful completion of this course, students will be able to:

- Describe the MinRole feature in SharePoint 2019
- Describe how to install and configure SharePoint 2019.
- Describe how to implement high availability for SharePoint
- Describe the authentication infrastructure in SharePoint 2019.
- Explain the concepts behind federated identity.
- Describe how to create site collections.
- Describe how to plan for authorization in SharePoint 2019.
- Provision a BDC Service Application instance.
- Configure the Secure Store Service application.
- Describe how to configure My Sites in SharePoint 2019.
- Describe how to configure the User Profile Service Application.
- Describe how to plan SharePoint Active Directory import and synchronization.
- Explain how to create and publish a content type across site collections.
- Identify the capabilities of the managed metadata service.
- Configure term sets and terms for managed navigation.
- Describe the function of search components.
- Explain how to plan and configure a search topology.

Contact ISInc for more information at 916.920.1700 or by visiting our website at <http://www.isinc.com>

- Describe how to configure search center.
- Describe the available SharePoint Hybrid Scenarios.
- Describe the requirements for SharePoint hybrid configuration.
- Plan for SharePoint Server hybrid.
- Configure SharePoint hybrid scenarios.
- Configure on-premises data gateway.
- Describe difference between cloud hybrid search and hybrid federated search.
- Evaluate different types of hybrid search.
- Configure cloud hybrid search.
- Configure hybrid search results.
- Plan for content migration process.
- Describe available resources and tools to leverage during migration process.
- Access data to be migrated using SharePoint Migration Assessment Tool
- Migrate content to the cloud using SharePoint Migration Tool (SPMT).
- Manage and monitor migration process

Prerequisites

This course requires that you meet the following prerequisites:

- Experience with Windows PowerShell.
- Basic understanding of SQL Server management.
- Basic understanding of networking, including DNS.
- Working knowledge of windows server administration.
- Basic understanding of Active Directory and Azure AD.
- Basic understanding of mobile device management, and alternative operating systems (Android and macOS)

Course Outline

Module 1: SharePoint Infrastructure

This module is about fundamental SharePoint Infrastructure. It describes the components in SharePoint farm. It also discusses how to install and configure SharePoint farm.

Lessons

- Plan a SharePoint Farm
- SharePoint 2019
- Install and Manage SharePoint Farm

After completing this module, students will be able to:

- Describe the MinRole feature in SharePoint 2019
- Describe how to install and configure SharePoint 2019.
- Describe how to implement high availability for SharePoint

Contact ISInc for more information at 916.920.1700 or by visiting our website at <http://www.isinc.com>

- Plan farm backups and restore.

Module 2: SharePoint Authentication and Security

This module is about SharePoint Authentication and Security. It introduces different authentication methods in SharePoint 2019.

Lessons

- Plan Authentication
- Configure Federated Authentication

After completing this module, students will be able to:

- Describe the authentication infrastructure in SharePoint 2019.
- Describe NTLM and Kerberos authentication.
- Describe server-to-server authentication.
- Explain the concepts behind federated identity.

Module 3: SharePoint Content Management

This module is about SharePoint Content Management. It discusses the content structure in SharePoint. It also provides details on authorization and content access in SharePoint.

Lessons

- SharePoint Content Structure Overview
- Manage Access to Content
- Manage Site Collections

After completing this module, students will be able to:

- Explain the site collection concepts.
- Describe how to create site collections.
- Describe how to plan for authorization in SharePoint 2019.
- Describe how to manage permissions levels in SharePoint 2019.
- Describe how to manage SharePoint groups in SharePoint 2019.

Module 4: SharePoint Service Applications

This module is all about SharePoint service applications and workflow. It describes how to provision and manage a BCS service application and User Profile service application. Specifically, we discuss how to import and export BDC models as well as how to import user properties to SharePoint.

Lessons

- SharePoint Service Applications and workflow
- Plan and Configure Business Connectivity Services (BCS) and Secure Store
- Plan and Configure User Profiles

Contact ISInc for more information at 916.920.1700 or by visiting our website at <http://www.isinc.com>

After completing this module, students will be able to:

- Explain the key components of a BDC model.
- Describe the high-level architecture of BCS.
- Provision a BDC Service Application instance.
- Configure the Secure Store Service application.
- Explain the purpose of the Secure Store Service.
- Manage permissions for a BDC Service Application instance.
- Describe how to configure user profile properties.
- Describe how to manage audiences in SharePoint 2019.
- Describe how to configure My Sites in SharePoint 2019.
- Describe how to configure the User Profile Service Application.
- Describe how to plan SharePoint Active Directory import and synchronization.

Module 5: Plan and configure Managed Metadata

This module is about the integral functionalities, such as the Managed Metadata Service, content types, and term sets, that allow you to create and disseminate an information architecture. It introduces the purpose of content types as well as the concepts behind the managed metadata service, including taxonomies, term sets, and enterprise keywords.

Lessons

- Manage Content Types
- Managed Metadata
- Configure the Managed Metadata Service

After completing this module, students will be able to:

- Explain the function and use of content types.
- Describe the functions of the Managed Metadata Service.
- Explain how to create and publish a content type across site collections.
- Identify the capabilities of the managed metadata service.
- Create and manage term groups, term sets, and terms
- Configure term sets and terms for managed navigation.

Module 6: Plan and Configure Search

This module is about enterprise search service application. It provides details on planning and configuring content sources, crawl schedules, and crawl rules. It also discusses how to provision search management of a range of search components, such as Query Rules, Result Types and Display Templates.

Lessons

- Plan enterprise search
- Configure enterprise search
- Manage enterprise search

Contact ISInc for more information at 916.920.1700 or by visiting our website at <http://www.isinc.com>

After completing this module, students will be able to:

- Describe the function of search components.
- Explain how to plan and configure a search topology.
- Describe how to plan and configure content sources.
- Describe how to plan and configure crawl schedules.
- Describe how to plan and configure crawl rules.
- Describe how to manage the search schema.
- Describe how to configure search center.
- Explain the use and deployment of query rules.
- Explain the use and deployment of result source.

Module 7: Overview of SharePoint Hybrid Scenarios

This module is all about planning SharePoint Server hybrid. It provides an overview of SharePoint hybrid scenarios as well as requirements for configuration.

Lessons

- Overview of SharePoint Hybrid Scenarios
- Plan SharePoint Server hybrid

After completing this module, students will be able to:

- Describe the available SharePoint Hybrid Scenarios.
- Describe the requirements for SharePoint hybrid configuration.
- Plan for SharePoint Server hybrid.

Module 8: Implement SharePoint Hybrid Scenarios

This module is focused on implementing SharePoint hybrid scenarios. Specifically, it discusses the hybrid configuration roadmaps, including the configuration of hybrid infrastructure and hybrid picker. It also introduces On-premises data gateway to enable using Office 365 feature in SharePoint Server 2019.

Lessons

- Implement SharePoint Hybrid Scenarios
- Configure on-premises data gateway

After completing this module, students will be able to:

- Configure SharePoint hybrid scenarios.
- Configure on-premises data gateway.

Module 9: Implement SharePoint Hybrid search

This module is focused on SharePoint hybrid search. It introduces different types of hybrid search, including cloud hybrid search and hybrid federated search. It explains how to set up hybrid search and configure search results.

Contact ISInc for more information at 916.920.1700 or by visiting our website at <http://www.isinc.com>

Lessons

- Overview of SharePoint hybrid search
- Configure SharePoint Hybrid search

After completing this module, students will be able to:

- Describe difference between cloud hybrid search and hybrid federated search.
- Evaluate different types of hybrid search.
- Configure cloud hybrid search.
- Configure hybrid search results.

Module 10: Introduction of Migration

This module is all about planning the migration process to the cloud. It provides an overview of resources and tools to leverage during migration process.

Lessons

- Migration Overview
- Leveraging FastTrack and Partner Services

After completing this module, students will be able to:

- Plan for content migration process.
- Describe available resources and tools to leverage during migration process.

Module 11: Migrating to SharePoint Online

This module is focused on using SharePoint Migration Tool (SPMT) to migrate content to the cloud. Specifically, it discusses the requirement and limitation of SPMT. It introduces different migration methods for different data source, such as file shares and SharePoint content.

Lessons

- Prepare for migration
- Migrate content to the cloud
- Manage and monitor migration process

After completing this module, students will be able to:

- Access data to be migrated using SharePoint Migration Assessment Tool (SMAT).
- Migrate content to the cloud using SharePoint Migration Tool (SPMT).
- Manage and monitor migration process.
